Profile

Tech Lead with 6+ years architecting full-stack products across MERN, Angular/Ionic, and microservices. Currently leading cross-platform mobile development at Fingenesi, delivering Web, Android, and iOS from a single codebase. Known for integrating AI-assisted workflows (Claude Code, Cursor) that measurably shorten delivery cycles and improve code quality. Skilled in CI/CD automation, team mentoring, and aligning technical decisions with business goals..

Skills

Programming	Frontend:	React.js, Angular, Next.js, Ionic, TypeScript, HTML5/CSS3
	Backend:	Node.js, Express.js, NestJS, Spring Boot.
	Databases:	MongoDB, PostgreSQL, MySQL, Firebase, Elasticsearch
	AI Tools:	Claude Code, Cursor AI
	Auth/Logging:	Auth0, Sentry
	DevOps:	GitLab CI/CD, Docker, AWS EC2, Vitest, Playwright

Language Arabe : Native / Français : B2 / Anglais : B2

Work experience

Scanalpha Full stack developer 07-2025 -> Present

- Spearheaded end-to-end development of cross-platform applications using Ionic and Angular, delivering high-performance experiences across Web, Android, and iOS from a single codebase.
- Architected scalable backend systems with Node.js and Express, integrating WebSockets to support real-time data synchronization and high-concurrency user interactions.
- Managed the full mobile release lifecycle, overseeing App Store and Google Play submissions while maintaining rigorous quality and security standards.
- Optimized bundle sizes and load performance for mobile environments, leveraging Angular's modular architecture and Ionic's native integrations.
- Improved code quality and deployment efficiency by implementing Vitest unit tests and Playwright E2E tests, fully automated through GitLab CI/CD pipelines.
- Integrated Claude Code and Cursor AI into the daily workflow for test generation, WebSocket debugging, and TypeScript boilerplate automation — reducing manual QA effort noticeably.
- Implemented Auth0 for SSO authentication and Sentry for real-time error tracking, strengthening platform security and observability.

Tools: Ionic, Angular, Node.js, Express.js, WebSockets, TypeScript, HTML/CSS, Android SDK, iOS/Xcode, RESTful APIs, Git/GitHub, Agile/Scrum, Cursor AI, Claude code.

Navoy

Technical Lead MERN 04-2024 -> 07-2025

- Spearheaded design, development, and deployment of scalable web applications using the MERN stack (Next.js, NestJS, PostgreSQL, MongoDB), driving performance and architecture decisions across the full product lifecycle.
- Led and mentored a team of developers through code reviews, best practices enforcement, and skill-building initiatives — ensuring consistent delivery quality and on-time milestones.
- Introduced and standardized Claude Code and Cursor AI across the team, establishing prompting conventions and AI-assisted code review workflows that improved team-wide output quality.
- Leveraged AI tooling to accelerate NestJS microservices refactoring cycles, reducing technical debt turnaround and easing architecture transition overhead.
- Collaborated with stakeholders to align technical decisions with product roadmap priorities, contributing to architecture choices that supported long-term scalability.

Tools: NextJs, ReactJs, Typescript, NestJs, NodeJs, ExpressJs, HTML/CSS, Micro-service, Mongoddb, PostgreSQL, Git/Gitlap, Agile/Scrum, Cursor AI, Claude code.

Devwise

Full-Stack Software Engineer (Subcontracting) 06-2024 -> 07-2025

- **Front-End Development:** Created interactive and responsive user interfaces using Angular.
- **Back-End Design and Implementation:** Developed back-end solutions with Spring Boot (Java 17), adhering to best practices.
- **Database Management and Optimization:** Managed and optimized databases with Oracle and SQL Server.
- **Team Collaboration:** Worked closely with teams to ensure seamless integration between front-end and back-end components.

Tools: TypeScript, HTML/CSS, Angular CLI, Spring Security, Spring Data JPA, SQL Developer, Flyway, IntelliJ IDEA, Docker, Jenkins, Microsoft Teams, Confluence, Git/GitLab, Agile/Scrum.

M-360-D

Technical Lead (NodeJs/ReactJs) 08-2023 -> 04-2024

Marquet-360-Degree

- Oversaw a team of React.js and Node.js developers, providing guidance and support throughout the project.
- Collaborated with the development team to implement new features and improve existing codebase.
- Ensured code quality through code reviews and established coding standards.
- Maintained open communication with the client to gather requirements and provide project updates.

Tools: React js, Typescript, Node js, Express js, HTML/CSS, Micro-service, Mongoddb, PostgreSQL, Elasticsearch, Git/Gitlap, Agile/Scrum.

Alight

Technical Lead Front-end : 01-2023 -> 08-2023

BeExpert :

- Lead a team of developers in front-end web development projects, ensuring timely delivery and adherence to quality standards.
- Develop and maintain responsive, user-friendly interfaces using HTML, CSS, JavaScript, ReactJs and modern front-end frameworks (SharePoint online SPFX).
- Conduct code reviews, provide guidance and mentorship to team members, and foster a collaborative development environment.
- Implement best practices for performance optimization, cross-browser compatibility, and accessibility.

Tools: ReactJs, HTML5, CSS3, JavaScript, Typescript, Bootstrap, SharePoint SPFX online.

Software developer : 07-2020 -> 12-2022

- Delivered SharePoint SPFX / React solutions for 5+ enterprise clients including Cofat and Merck, focusing on intranet systems, document management, and custom Power Apps integrations.

Tools: ReactJs, HTML5, CSS3, JavaScript, Typescript, SharePoint, Teams, Nodejs.

Inscript

Full-stack developer : 02-2019 => 06-2020

[consultationenligne](#) : A web application for a clinical psychologist.

Tools: ReactJs, NodeJs, Firebase. Package: Redux, Socket.io, WebRTC, ...

[demo.vinko.io](#) : A demo application of the startup vinko, pairing startups with experts.

Tools: ReactJs, NodeJs, Mongoddb, AWS EC2. Package : Redux, ...

[vinko.io](#): A website for the company vinko

Tools : Bootstrap, HTML5, CSS3, JavaScript, JQuery, Ajax, PHP.

Freelance experience

Fully automated trading bot: 06-2021 => 10-2023

- Developing Price Action strategies into algorithms
- Back testing of complex strategies
- Using statistical risk management models for optimization
- Monitoring performance and continual maintenance
- Developing platform to manage the strategies and display the results every 24h

Tools: NodeJS, ReactJS, HTML5, CSS3, Javascript, Bootstrap, AWS EC2, MongoDB

PFE

02-2019 => 06-2019

Create a mobile application that facilitated seamless communication between entrepreneurs and investors within Company Inscript. The project utilized Expo (React Native) and Firebase technologies.

Projet

08-2018

Freelancer, Web application for a daycare center «Manage the list of students and staff and the payment list (Angular 6/Spring Boot) ».

04-2017

End of year project, realizes within the national engineering school of Gabes, subject: Realizing an Android application «user reviews about restaurants»

04-2016

Projet fin d'année, Réalise au sein de l'école nationale d'ingénieur de Gabès, sujet : Réalisation d'une application web : Bibliothèque en ligne. (HTML & CSS & JavaScript, PHP & MySQL).

Education

2015 – 2019 Gabes National School of Engineering (ENIG), Tunis

Engineering cycle in Networks and communication with honors Quite good.

2012 – 2015 Nabeul Engineering Preparatory Institute, Tunis.

Cycle préparatoire filière Physique Chimie (PC).

2008 – 2012 Lycee Mahmoud El Messadi, Nabeul, Tunis.

Baccalaureate degree in Computer Science, Mention Good.
